

User guide

Everything you need to run your travel agency —
from first login to daily operations.

TravelAgencyWeb — travel agency software for Bangladesh

This printable guide is in English. The same guide is inside the app in English and বাংলা
(Settings → User Guide).

Quick start — your first 10 minutes · 10 min

Do these six things and your agency is live.

1. Set your agency name, logo and phone number in Settings → Organization.
2. Add your first client (Clients → New client).
3. Add a service or package you sell (Packages → New).
4. Create a booking for the client, or add a quick inquiry to follow up later.
5. Raise the invoice from the booking and record the advance payment.
6. Open the Dashboard — your revenue, dues and follow-ups now appear automatically.

Tip: your plan starts with the essential menu. Advanced modules (Hajj desk, website builder, HR, sub-agents) can be switched on by Business and Ultimate plans in Settings → Optional modules.

The core workflow

Every agency runs on the same money trail. Follow it and nothing slips.

1 Capture the customer

1. Someone asks for a price — add them as a client (or as a quick inquiry booking).
2. Record what they want: destination, dates, number of travellers.
3. Send a quotation if they need a formal price.

2 Confirm the sale

1. When they agree, create (or convert the quotation into) a booking.
2. Set the booking status to Confirmed.
3. Assign a staff member or agent so it's clear who owns it.

3 Collect the money

1. Raise the invoice from the booking — totals are filled in for you.
2. Record each payment (cash, bKash, bank, card). The balance updates automatically.
3. Overdue and partly-paid invoices show up on the Dashboard and Invoices page.

4 Track profit & operations

1. Log supplier costs and office expenses so profit is real, not a guess.
2. Use Reports to see revenue, dues and profit for any date range.
3. Complete the trip, then keep the client for repeat business.

Three areas, one system

Understanding these three keeps the menu simple.

Catalog — what you sell

Sales & operations — the deal

Money — cash in and out

Packages and services you offer. Reusable templates for quotes and bookings.

Quotations and bookings for a specific customer. This is where the work happens.

Invoices, payments, expenses and the ledger. The heart of the system.

Video tutorials

Short, step-by-step videos for every part of the system.

▶ **Getting started & your dashboard** 4 min

First login, setting up your agency, and reading the dashboard.

▶ **Add a client & upload documents** 3 min

Create a client record, store passport/NID, and set expiry alerts.

▶ **Create & send a quotation** 4 min

Build a price quote, add line items, and share it with the customer.

▶ **Turn an inquiry into a booking** 5 min

From a price-asking customer to a confirmed booking — no retyping.

▶ **Raise an invoice & record payment** 4 min

Generate the invoice, take an advance, and track the balance due.

▶ **Dues, expenses & the ledger** 5 min

Follow receivables, log expenses, and read your accounts.

▶ **Reports & business insights** 3 min

Sales, profit, and payment reports to understand your agency.

▶ **Manage your team & roles** 3 min

Invite staff, assign roles, and control who sees what.

▶ **Settings, plan & optional modules** 4 min

Branding, billing, and switching advanced modules on or off.

▶ **Switch language (English ⇌ Bangla)** 1 min

Change the whole interface between English and Bangla in one tap.

Module reference

Every part of the system, in order. Advanced modules are marked and require Business or Ultimate.

1 Getting started

Set up your agency once, then you're ready to work. This takes about five minutes.

1. Log in with the email and password you were given. The interface opens in English — switch to Bangla any time from the language button in the top bar.
2. Open Settings → Organization and enter your agency name, logo, phone, address and website.
3. Review your plan under Subscription so you know your limits and which modules you have.
4. Add your team under Team so each person logs in with their own account and role.
5. Add a client and a service, then create your first booking to see the flow end to end.

Tips

- Practise on the demo account first — you can't break anything there.
 - The onboarding checklist on the Dashboard walks you through the same steps.
-

2 Your daily routine

Open one screen a day and you'll never lose a customer or a payment.

1. Open the Dashboard — it shows today's follow-ups, dues, and new inquiries.
2. Work the follow-up list: message or call each customer, then snooze or convert.
3. Record any payments that came in — the balances update everywhere instantly.
4. Add new inquiries as they arrive (name, phone, what they want — 10 seconds).
5. Before closing, check overdue invoices and send a reminder where needed.

Tips

- If you only do one thing a day, clear the Dashboard follow-up list.
-

3 Language — English & Bangla

The whole system works in both English and Bangla. English is the default; Bangla is one tap away.

1. Find the language button in the top bar (it shows the other language you can switch to).
2. Tap it to switch the entire interface between English and Bangla instantly.
3. Your choice is remembered on this device for next time.

Tips

- Each staff member can choose their own language — it doesn't change it for anyone else.

4 The menu, explained

The left menu is grouped so you always know where to look.

1. Overview — your Dashboard and daily snapshot.
2. Contacts — Clients and Vendors/Suppliers.
3. Sales & bookings — Quotations, Bookings and your service catalog.
4. Money — Invoices, Payments, Expenses, Accounts and Reports.
5. Manage — Tasks, Team, Settings, Organization and Subscription.
6. Advanced modules (Hajj desk, website, HR, sub-agents and more) appear only on Business and Ultimate plans, once switched on in Settings → Optional modules.

5 Dashboard

Your agency at a glance — the numbers that matter and the tasks that need you today.

1. Top cards show revenue, dues, bookings and profit for the current period.
2. The follow-up strip lists inquiries due today so nothing is forgotten.
3. Click any card or row to jump straight to the underlying list.

6 Inquiries & follow-ups

A customer who only asked a price is your most valuable lead. Capture it in seconds.

1. When someone asks for a price, add a booking and set its status to Inquiry.
2. It appears on the Dashboard under 'inquiries to follow up'.
3. Not ready to buy? Snooze it to a date and it comes back on that day.
4. Ready? Message or call them straight from the row.
5. When they agree, change the status to Confirmed — invoice and payment follow automatically.

Tips

- There's no separate lead module — the booking status handles the whole journey.
- Set a follow-up date on every inquiry so it never falls through the cracks.

7 Clients

Your customer database — the asset that drives repeat business.

1. Add a client with name and phone; email, passport, NID and address are optional.
2. Upload passport and document scans to the client's profile for quick access.
3. Set passport expiry so you get alerts before it lapses.
4. Mark corporate clients as a company to track their staff travel together.
5. Open any client to see their full history: bookings, invoices and payments.

Tips

- Tag your best customers as VIP or Repeat to find them fast.
- A complete client profile makes the next booking twice as quick.

8 Vendors & suppliers

Airlines, hotels, transport and visa partners — and what you owe them.

1. Add each supplier with a category (airline, hotel, transport, visa).
2. Record supplier bills against a booking to track your costs.
3. Log payments to suppliers so payables stay accurate.

Tips

- The payables view shows who you owe and when it's due.

9 Corporate travel Business & Ultimate

Manage company clients whose staff travel regularly. (Business & Ultimate plans.)

1. Add the company as a corporate client.
2. Book travel for their employees and group it under the company.
3. Use the corporate view to see each company's spend and open invoices.

10 Quotations

A professional price quote the customer can say yes to.

1. Create a quotation from a client or an inquiry.
2. Add line items (flights, hotel, transport) with your selling price.
3. Start from a package to fill the details automatically.
4. Send it to the customer; track whether it's sent, accepted or rejected.
5. When accepted, convert it to a booking in one click — nothing is retyped.

11 Packages & services

Reusable templates for what you sell — so quotes and bookings are fast.

1. Create a package with a title, code and price.
2. Set the service type (Umrah, tour, air ticket, visa, and more).
3. Add inclusions, itinerary and pricing so it's ready to reuse.
4. Mark your best sellers as featured.
5. Reuse a package in any quotation or booking to save typing.

Tips

- Keep a few well-built packages — they speed up every sale.

12 Bookings

The confirmed deal — the centre of your operations.

1. Create a booking directly, or convert it from a quotation.
2. Pick the type (package, ticket, hotel, visa, tour) and the client.
3. Enter the selling amount and your cost — profit is calculated for you.
4. Set the status: Inquiry, Confirmed, Completed or Cancelled.
5. Assign a staff member or agent so ownership is clear.
6. Raise the invoice straight from the booking.

Tips

- Use Inquiry status for price-askers so they land on your Dashboard.

13 Invoices

Bill the customer and always know exactly what's owed.

1. Generate the invoice from a booking — totals are filled in for you.
2. Send it to the customer; the status tracks paid, partial, unpaid and overdue.
3. Record payments against it and the balance updates automatically.
4. The Invoices page and Dashboard highlight anything overdue.

14 Payments

Record money as it comes in so dues are always accurate.

1. Open an invoice and add a payment (cash, bKash, bank transfer, card).
2. The invoice balance and the client's dues update instantly.
3. Partial payments are supported — take an advance now, the rest later.
4. Each payment posts to your ledger automatically.

Tips

- Installments are ideal for Hajj and big tour packages — record each one as it arrives.

15 Expenses

Log what your agency spends so profit is real, not a guess.

1. Add an expense with a category (rent, salary, marketing, utilities).
2. Set the amount, date and how it was paid.
3. Expenses flow into your accounts and profit reports.

16 Accounts & ledger

The full financial picture — cash, bank, receivables and payables.

1. Set up your cash, bank and mobile (bKash) accounts.
2. Every payment and expense posts to the ledger automatically.
3. See receivables (what customers owe) and payables (what you owe suppliers).
4. Check profitability per booking and overall.
5. Filter the ledger by date to reconcile a period.
6. Export to CSV for your accountant.

17 Reports

Understand your business with numbers, not guesswork.

1. Pick a date range to focus any report.
2. Sales report — revenue and bookings over time.
3. Profitability — selling price minus cost, per booking and overall.
4. Payments — what came in, by method.
5. Receivables — outstanding dues by customer.
6. Staff and agent performance — who's driving revenue.
7. Export any report for records or sharing.

18 Tasks

Simple to-dos so operational steps never get missed.

1. Add a task with a title, due date and priority.
2. Assign it to a team member.
3. Mark it done when complete — overdue tasks stay visible.

19 Documents

Keep passports, tickets and vouchers in one safe place.

1. Upload documents to a client, booking or the central library.
2. Find a file fast by client or booking.
3. Download or share when you need it.

20 Team & roles

Add your staff and control who can see and do what.

1. Invite a team member by email from the Team page.
2. Choose a role: Owner, Manager, Sales agent, Accountant or Operations.
3. Each role sees only the parts of the system it needs.
4. Deactivate anyone who leaves so their access ends immediately.

Tips

- Keep finance (Accountant) separate from booking approval — it protects your cash.

21 Organization

Your agency's identity across the whole system.

1. Set your name, logo, phone, address and website.
2. These details appear on invoices, quotations and your public site.
3. Keep them current — customers see them everywhere.

22 Subscription & plan

Your plan sets your limits and which modules you can use.

1. See your current plan, price and renewal date.
2. Compare plans to know what each unlocks.
3. Upgrade to Business or Ultimate to switch on advanced modules.
4. Submit a payment request to renew; the admin approves it.

23 Settings

Configure the system to match how your agency works.

1. Organization, billing, notifications and optional modules live here.
2. Business & Ultimate: switch advanced modules on or off under Optional modules.
3. Set notification preferences for new bookings, payments and inquiries.

24 Sub-agents & commission Business & Ultimate

Work with B2B sub-agents and track their commission. (Business & Ultimate plans.)

1. Add each agent and set their commission rate.
2. Assign bookings to an agent to attribute the sale.
3. See each agent's bookings, sales and commission owed.

25 Service operations desk Business & Ultimate

Operational tracking for visa, ticketing and service files. (Business & Ultimate plans.)

1. Track the operational status of each service file separately from payment.
2. Move files through their steps to completion.
3. See what's pending action across all bookings.

26 Hajj & Umrah operations Business & Ultimate

A dedicated desk for pilgrims, groups and installments. (Business & Ultimate plans.)

1. Create Hajj/Umrah packages and groups.
2. Add pilgrims with passport, mahram and rooming details.
3. Track each pilgrim's installment payments and balance.
4. Manage visa and document status per pilgrim.

Tips

- Installment tracking is built for the way Hajj is paid in Bangladesh.

27 Website & CMS Business & Ultimate

Build a public website for your agency. (Business & Ultimate plans.)

1. Choose a template and set your colours, logo and content.
2. Publish your packages so customers can browse them online.
3. Add a blog and set SEO details to be found on Google.
4. Connect your own domain and go live.

28 Notifications — SMS, email & WhatsApp Business & Ultimate

Keep customers informed automatically. (SMS/WhatsApp on higher plans.)

1. The bell shows in-app alerts for bookings, payments and inquiries.
2. Set up SMS and WhatsApp under Settings to send confirmations and reminders automatically.

29 Customer & supplier portal Business & Ultimate

A self-service login for your customers and suppliers.

1. Customers sign in with a magic link (no password to remember).
2. They see their bookings, invoices and payment status.
3. Suppliers can review the bills you've shared with them.

Tips

- The portal is separate from your staff login and shows only that person's records.
